

FEDERAL COMMUNICATIONS COMMISSION

WASHINGTON, D.C. 20554

20 AUG 1992

IN REPLY REFER TO:

8910-DTN

Thomas B. Beardsley, General Manager
Radio Station WLVC(AM)
6 - 10th Avenue
Madawaska, Maine 04756

Dear Mr. Beardsley:

This refers to your letter of May 30, 1992, regarding the power increase for class IV station WLVC(AM), Fort Kent, Maine.

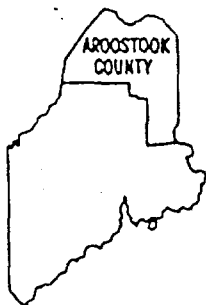

On March 23, 1984, the Commission released a Report and Order concerning the nighttime power limitations for class IV AM broadcast stations (Docket No. 79-265). In the Docket, class IV stations are categorized into two groups and placed on either "list A" or "list B". List A includes stations that operate with less than 1 kW daytime or which use a directional array daytime. These stations, in order to obtain higher power, are required to follow the normal two-step application process. They must first file a form 301 application proposing the increase in power, which will be treated as a minor change, and then file a form 302 to have a license issued to cover that permit. List B includes stations that operate with 1 kW daytime non-directionally. The rulemaking proposed that these stations received Show Cause Orders to modify their licenses to specify nighttime power of 1 kW. These Show Cause Orders have been issued. WLVC(AM) was placed on list A.

A preliminary study of your proposal indicates that the daytime power increase will not create a prohibited duopoly overlap. However, in order to increase the daytime power to 1 kW, WLVC(AM) needs to follow the two-step process indicated above.

Sincerely,

Larry D. Eads, Chief
Audio Services Division
Mass Media Bureau

ROBERT JONES
DIRECTOR

May 14, 1991

Federal Communications Commission
Washington, D.C.

To Whom It May Concern:

Recently my office and staff worked with the radio station WLVC-AM in Fort Kent, Maine, during a very difficult situation. The situation that I am referring to is the massive flooding and ice jams that occurred along the St. John River that eventually led to a Federal Disaster declared by President Bush.

The area which was hardest hit by the flooding was the community of Allagash, which has no local radio service. The nearest local U.S. signal is WLVC in Fort Kent. The next nearest U.S. signal originates from Madawaska.

During the flood, WLVC was a valuable communications tool for everyone involved. Station management was available to us 24 hours a day and provided a vital communication link to the people of the St. John Valley during some very trying times. Without WLVC and their sister station WSJR, many people would have been left in the dark, literally and figuratively, as the emergency situation developed. Unfortunately, the people West of Fort Kent, in the very remote Allagash region, were indeed without the valuable service offered by WLVC in this particular time of need.

This is why I would like to support WLVC in their request to operate at 1000 watts full time. It is my understanding that the station is currently licensed for 250 watts days and 1000 watts nights. At the time of the flood, they were only licensed for 250 watts, full time.

The extra power, full time, would certainly have been useful to my office this Spring and may be useful in the future in serving this very remote area.

Sincerely,

Robert R. Jones, Director
Aroostook County Emergency Management

To Whom This May Concern:

RE: Request by WLVC AM Radio Station for approval to increase power from 250 to 1000 watts

I am writing on behalf of the citizens and students of the seven (7) town district of M.S.A.D. No. 27. This Administrative District is the second largest geographical school district in Maine. We presently have the largest single elementary school building in Maine. Our district enrollment is approximately 1,650 students. The commercial and residential area of this district is in Fort Kent, Maine - population 4,500. The only means of communication to parents at a time of emergency or closing or postponing of school due to winter storms or disasters, is through WLVC AM Radio. Presently, WLVC Radio is operating at 250 watts during daylight hours. This low power does not provide service to nearly half of our district parents.

For the safety of our children and for the peace of mind and convenience of parents, I respectfully request that the Federal Communications Commission allow WLVC Radio to operate at 1000 watts of power during all of its regular programming time. If more documentation or concept is needed for this report, please feel free to contact my office. I look forward to your timely response to this request.

Sincerely,

MAINE SCHOOL ADMINISTRATIVE
DISTRICT NO. 27

RE: Request by WLVC AM Radio Station of Fort Kent, Maine for
approval to increase power from 250 watts to 1000 watts

I am writing in support of WLVC Radio Station's request to increase its transmitting power from 250 watts to 1000 watts. This increase will enable WLVC Radio to reach all the households in Maine School Administrative District No. 27 in the event of an emergency or school closing due to inclement weather. Presently, WLVC provides the only means of communication in the state's second largest school district; however, only half of the households are being reached as a result of the station's current low wattage. In the interest of safety and public service, I encourage the FCC to grant WLVC Radio permission to operate at 1000 watts of power.

Sincerely,

John L. Martin
Speaker of the House

Federal Communications Commission

To Whom This May Concern:

RE: Request by WLVC AM Radio Station for approval to increase power from 250 to 1000 watts

I represent part of the area in question in the State Legislature. We're situated in Northern Aroostook County and are privileged to be served by WLVC AM Radio. However, this advantage is negated by the inability to penetrate the area. WLVC is doing an excellent job in providing public service programming. However, that service is now inappropriately being fractured.

The value of a good communication link in this geographically isolated area is a must. We have many other obstacles to overcome. This shouldn't be one of them. WLVC Radio is willing to rectify the inequity. The link would enable us to reach all area residents simultaneously.

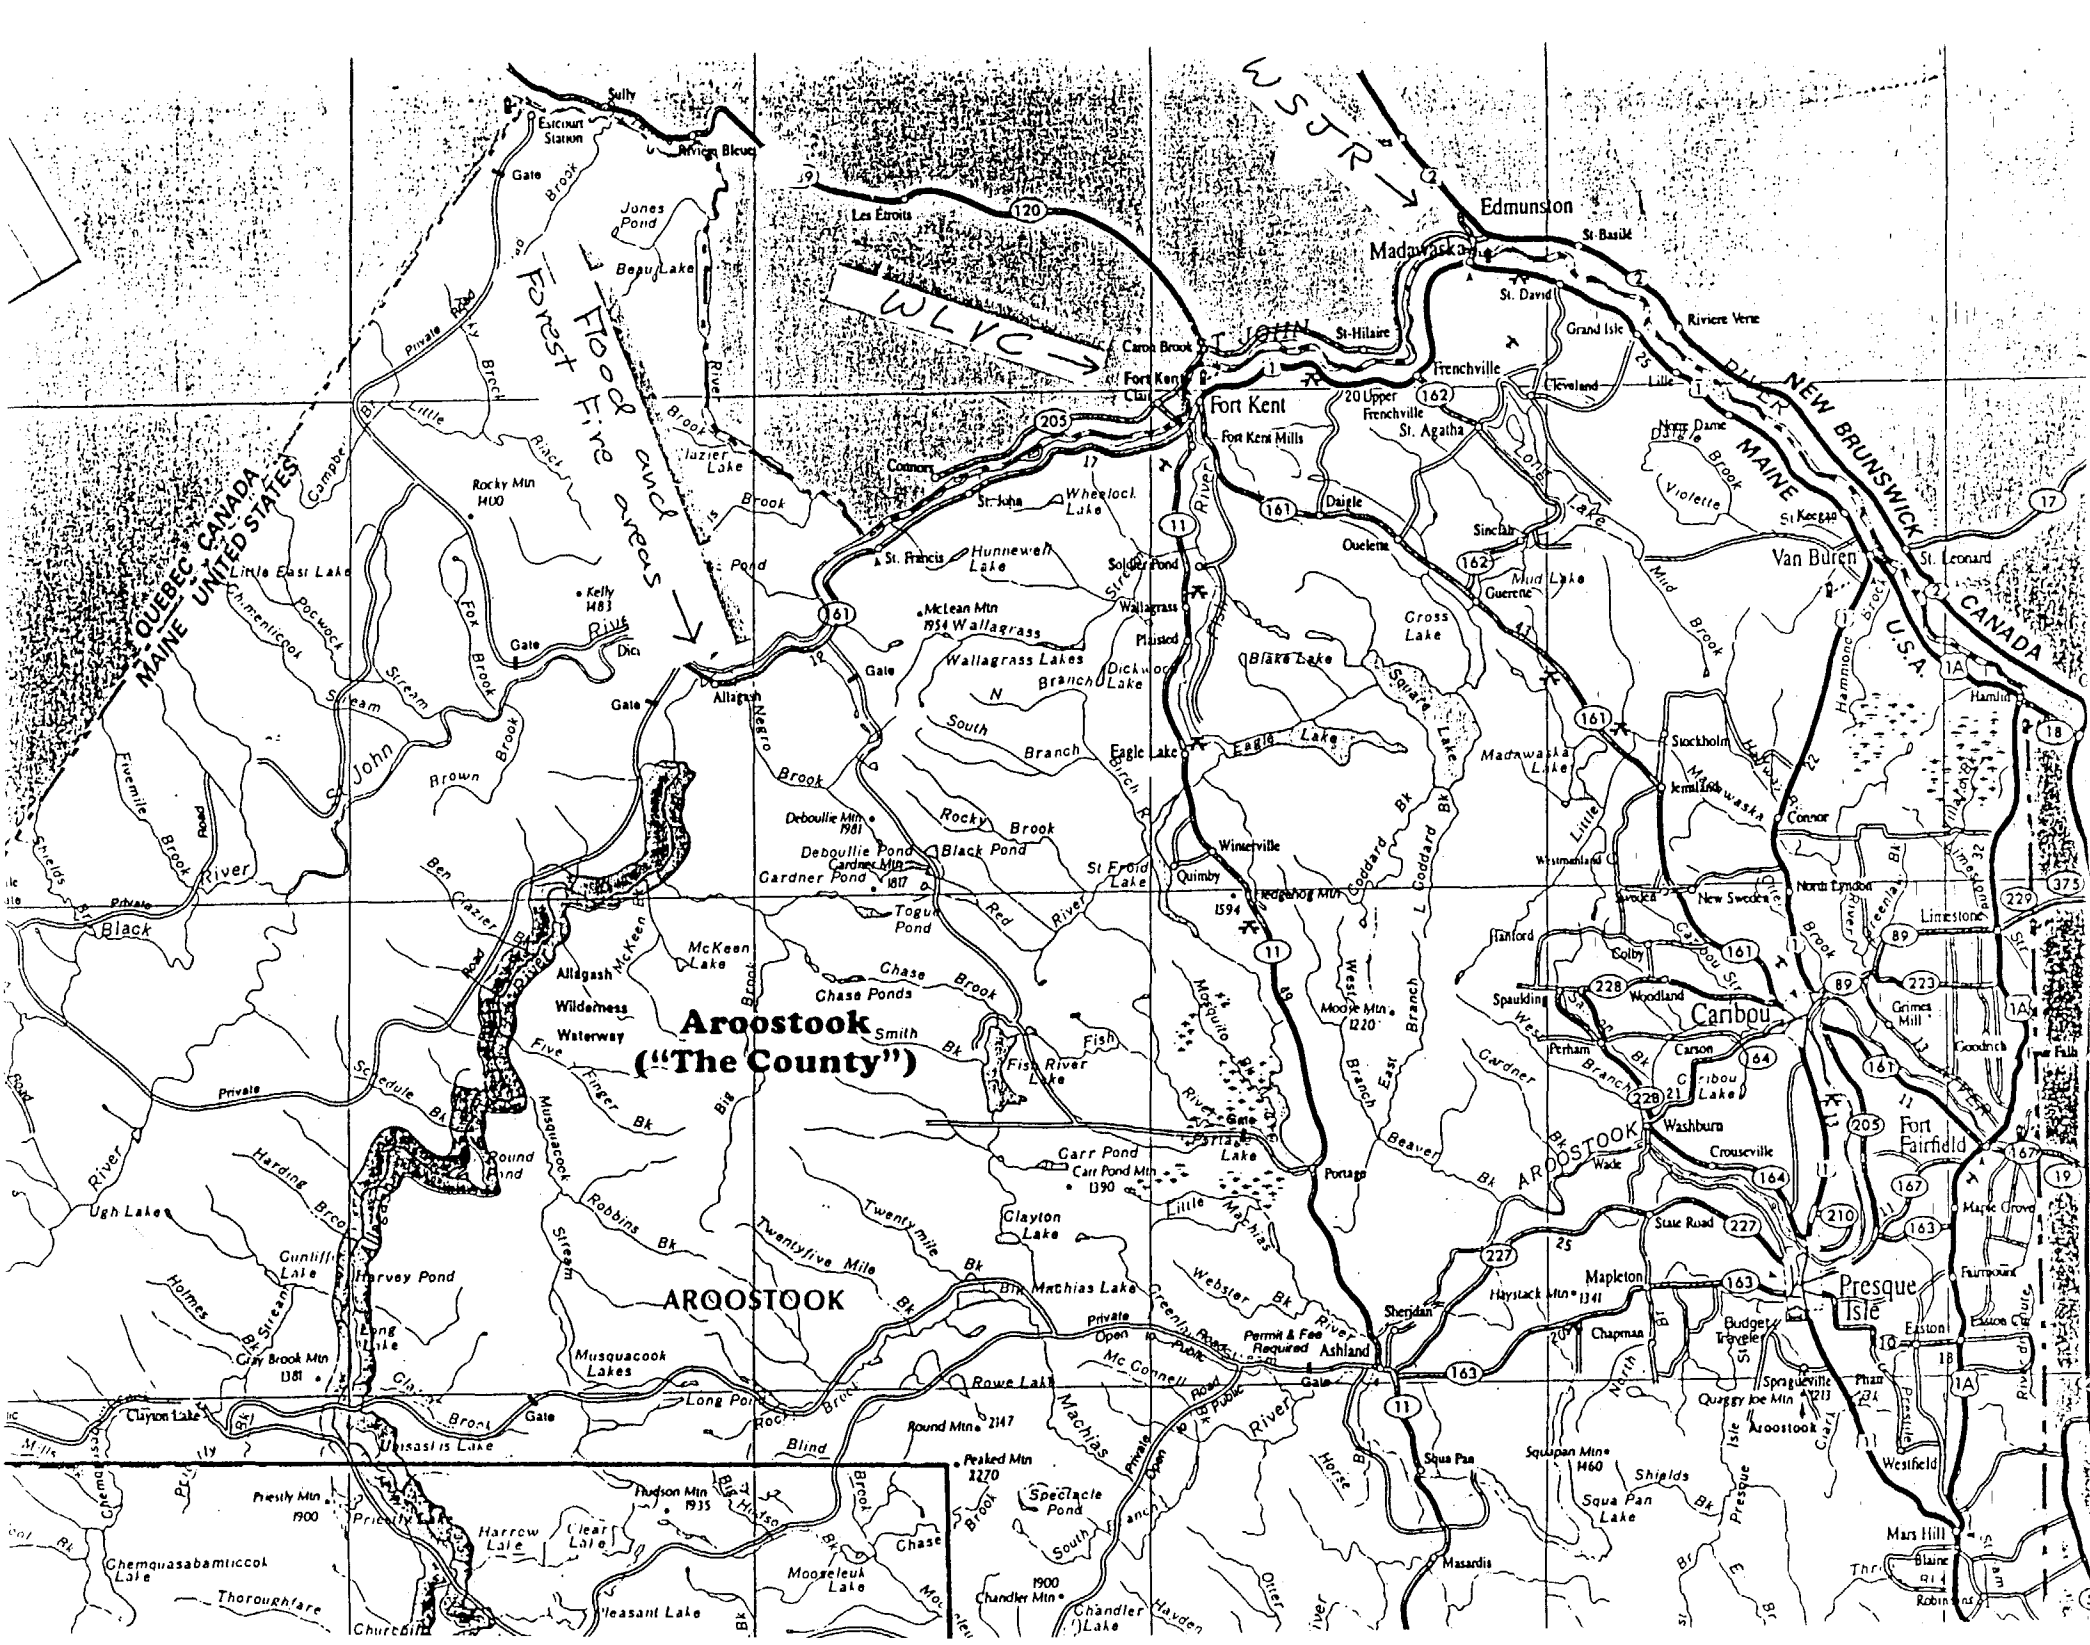

I urge the Commissioner to allow WLVC Radio to operate at 1000 watts as soon as possible. It's needed by the population living here.

I appreciate your kind attention to this matter.

Sincerely,

Judy Paradis

Honorable George Mitchell, Senator
United States Senate
Washington, DC 20510-1902

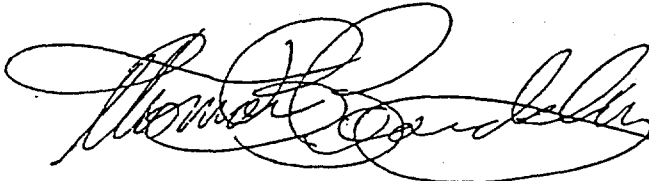

Dear Senator Mitchell:

I am attempting to get a minor upgrade of our operating power in Fort Kent on station WLVC-AM through the Federal Communications Commission. Normally this can be a fairly expensive process. I am admittedly asking the commission for some leeway to get the upgrade for reasons that will be obvious when you review the enclosed materials.

To make a somewhat long story short, we could do a much better job serving some very remote Aroostook County areas if we could get the upgrade. Unfortunately, any additional expense to go through the normal channels makes it prohibitively expensive. We are struggling just to survive, let alone spend money on a technical upgrade that will do very little for us on the revenue producing side of things.

Your consideration of this matter would be greatly appreciated. Thank you in advance for whatever you may be able to do.

Respectfully yours,

Thomas B. Beardsley
General Manager

8/29/92

Honorable George Mitchell, Senator
United States Senate
Washington, D.C. 20510-1902

Dear Senator Mitchell:

First of all, thank you very much for intervening on my behalf with regard to my recent request to the Federal Communications Commission. Your involvement was, no doubt, the reason I received a very timely response. Unfortunately, the response was not exactly the one we had hoped for. A copy of Mr. Eads reply is enclosed for your information.

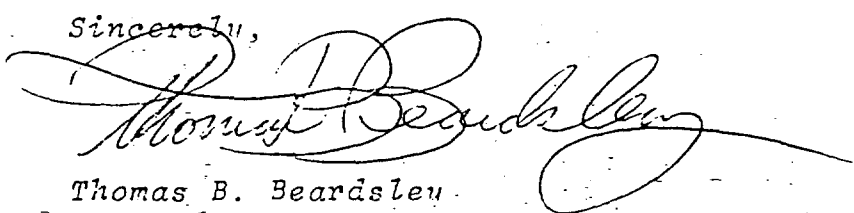

As I read it, the F.C.C. agrees that my request would represent what they would categorize as a "minor" change. The fee for a minor change application is \$565.00. The follow-up form #302 carries a fee of \$370.00. A total of \$935.00 for the privilege of paying higher electric bills to provide better emergency service to some areas of our state that truly need it at certain times of the year.

Interestingly enough, the fees we are talking about are the same for all stations regardless of their size, their market or their income. A "minor" change for WCBS in New York City is the same as it is for WLVC in Fort Kent, Maine.

While I am not giving up, I will have to place this project on the back burner for now since \$935.00 is completely beyond my means at this time. As I said before, very little, if any financial gain will be realized by this upgrade if it is eventually acquired. The people of School District 27 will have to make it through another winter without adequate communication and the Allagash area will have to rely on some other means of receiving flood warnings next spring.

Again, thank you for your help.

Sincerely,

Thomas B. Beardsley
General Manager

INSTRUCTIONS FOR COMPLETING FEE PROCESSING FORM, FCC FORM 155, May 1990

- (1) **"Applicant Name"** - Enter the name (last, first, middle initial) of the applicant as it appears on the original application or filing being submitted with this Fee Processing Form. If company, enter name which is used commercially.
- (2) **"Mailing Address (Line 1)"** - Enter the street address or post office box number to which the applicant wishes correspondence sent.
- (3) **"Mailing Address (Line 2)"** - This line may be used for further identification of the address if additional space is required.
- (4) **"City"** - Enter the name of the city associated with the given street address.
- (5) **"State or Country"** - Enter the appropriate two-digit state abbreviation as prescribed by the U.S. Postal Service. If address is foreign, enter the appropriate country name here.
- (6) **"ZIP Code"** - Enter the appropriate five or nine-digit ZIP code prescribed by the U.S. Postal Service.
- (7) **"Call Sign or Other FCC Identifier"** - Enter an applicable call sign or unique FCC identifier, if any, as shown on your attached application or filing. If applying for a service affecting more than one call sign, enter one call sign only.
- (8) **Column (A), "Fee Type Code"** - Enter correct Fee Type Code(s) from the appropriate Fee Filing Guide. Only one Fee Processing Form may be submitted per application or filing. Inaccurate or erroneous Fee Type Codes may result in your application or filing being returned to you without further processing.
- (9) **Column (B), "Fee Multiple"** - Certain applications and filings may request action with respect to more than one station, license, frequency, or party and can be submitted together with one check if they meet specific conditions. This column is used only if a multiple, i.e., two or more, is being applied for. Examples of when this would be used are renewing more than one call sign, frequency, station, or the transfer of control of more than one station. Refer to the appropriate Fee Filing Guide for additional information.
- (10) **Column (C), "Fee Due For Fee Type Code In Column (A)"** - Enter in this block the amount of the fee associated with the Fee Type Code shown in Column (A) (times (x) the fee multiple, if required).
- (11) **"Total Amount Remitted With This Application or Filing"** - Enter the total of lines (1) through (5) of Column (C). This amount should equal the amount of your check or money order. We will not accept multiple checks.

HOW TO SUBMIT APPLICATIONS AND FILINGS

- a. Each application or filing should be assembled with the Fee Processing Form stapled to the top of the application with the check placed on top of the Fee Processing Form. **DO NOT STAPLE THE CHECK TO THE APPLICATION OR FEE PROCESSING FORM.** Required copies of application should be clearly identified as "duplicate copy" and placed behind the original package. A copy of an application or filing submitted for record-keeping purposes only should be placed at the bottom of the submission. Extraneous material and extra copies should be avoided at all times. Failure to abide by these instructions will delay the processing of your submission.
- b. Completed applications or filings should be mailed to the proper address shown in the Fee Filing Guide for the particular service for which you are applying or making a filing. Applications and filings which are properly addressed to the appropriate P.O. box number may also be hand delivered to the following address. Applications received before midnight on a normal business day will receive that day's date as the receipt date. Deliveries made after midnight on Fridays will not be "officially" receipted until the next Monday. Applications received on weekends and government holidays are dated the next regular business day.

Federal Communications Commission
c/o Mellon Bank
Three Mellon Bank Center
525 William Penn Way
27th Floor, Rm. 153-2713
Pittsburgh, Pennsylvania
(Attention: Wholesale Lockbox Shift Supervisor)

- c. A single check, bank draft or money order made payable to the Federal Communications Commission and denominated in U.S. dollars and drawn upon a U.S. financial institution must be included with each application or filing requiring a fee. No postdated, altered or third-party checks will be accepted. Do not send cash.

- d. Parties hand delivering applications or filings may receive dated receipt copies by presenting copies of the applications or filings to the acceptance clerk at the time of delivery. Receipts will be provided for mail-in applications or filings if an extra copy of the application or filing is provided along with a self-addressed stamped envelope. Only one piece of paper per application or filing will be stamped for receipt purposes.

REMEMBER

- a. A separate completed Fee Processing Form is required with each application or filing except in certain circumstances. Please refer to the appropriate Fee Filing Guide for additional information.
- b. A wrong Fee Type Code or incorrect remittance may result in your application or filing being returned without processing, or result in the dismissal of your application or filing. Please ensure that FEE TYPE CODES are correct and that your check or money order equals the amount shown in the TOTAL AMOUNT REMITTED WITH THIS APPLICATION OR FILING block before submitting your application or filing.
- c. If you have any questions completing this form, please call the Fees Hotline, 202/632-FEES.

FCC NOTICE FOR INDIVIDUALS REQUIRED BY THE PRIVACY ACT AND THE PAPERWORK REDUCTION ACT

Part 1, Subpart G of the Commission's rules authorize the FCC to request the information on this form. The information requested is required in order to obtain a license or authorization from the Commission. The purpose of the information is to provide a means to link a fee payment to a specific invoice, application or filing. The information will be used by the Commission to maintain data concerning fees paid to the Commission, for internal financial control, audit, and reporting purposes. Information requested on this form will be available to the public. Your response is required to obtain a license or other authorization from the Commission.

Public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Federal Communications Commission, Office of Managing Director, Washington, DC 20554, and to the Office of Management and Budget, Paperwork Reduction Project (3060-0440), Washington, DC 20503.

Exhibit Number 3

The transmitter/Antenna site for WSTR is located in a remote area that is rarely, if ever travelled by the public. Much of the year it is accessible only by snowshoe. There are no residences or commercial buildings near it and it is clearly marked by three no-trespassing signs and eight RF Radiation warning signs. The base of the tower is completely fenced in by an eight-foot high fence, the entrance of which is padlocked.

All routine maintenance at the transmitter and antenna site is done between the hours of twelve midnight and six a.m., when WSTR is not in operation.

The STL transmit antenna for WSTR is located on a tower mounted on the peak of the roof of a two story building. A ladder is required for access to the roof. All maintenance on the tower and antenna is done when the STL is not in operation. The rooftop itself is not accessible by the general public and the three sides of the tower are labeled with RF Radiation warning signs.

Exhibit 3 pertains to question 7 and was prepared by Thomas B. Beardsley on October 21, 1990.

Exhibit Number 2

Lamoille Broadcasting and Communications is a general partnership between two natural persons and therefore, exempt from the requirement for filing of an annual ownership report.

However, as required by the commission, when Lamoille Broadcasting and Communications acquired WSTZ, an ownership report was filed on March 26, 1990. That report is complete and up-to-date.

A letter of certification, the \$35.00 fee and F.C.C. form 155 have been sent to the secretary of the F.C.C. at the appropriate address. A copy of the letter and form 155 are enclosed with this application for renewal.

Exhibit number 2 pertains to question 4. (b) and was prepared by Thomas E. Beardsley on October 21, 1990.

Exhibit Number 1

JSJR employs fewer than five full time employees and therefore is not required to file an annual employment report.

Exhibit number 1 pertains to question 4.(a) and was prepared by Thomas S. Beardsley on October 21, 1999.

In re: WSJR(AM)
Madawaska, ME
BR-901115UF

Dear Licensee:

Review of the above-referenced renewal application indicates that it is deficient in the manner described below:

- ☒ the information provided regarding the station's environmental impact (including radio frequency radiation) does not demonstrate compliance with 47 C.F.R. Section 1.1307) (see enclosed clarification);

Processing of the application cannot be completed until the noted deficiency has been corrected. Accordingly, please submit the required information as an amendment to the application, in duplicate, to Room 302 of the Commission, attention Lakisiha J. Young. If you have any questions concerning the above, please contact Ms. Young at (202) 632-6485.

Sincerely,

Larry D. Eads
Chief, Audio Services Division
Mass Media Bureau

Dear Ms. Young:

Enclosed, you will find an amendment to Lamoille Broadcasting and Communications license renewal application for radio station WSJR AM in Madawaska, Maine. (BR901115UF) as requested by the Commission in 8900-LJY, dated 1 March, 1991.

We sincerely hope the information enclosed answers any questions you may have about our application. If not, please feel free to contact me at (207) 728-4000.

Thank you in advance for your attention to this matter.

Respectfully yours,

Thomas B. Beardsley
General Manager

RECEIVED

Amendment to license renewal application BR901115UF for radio station WSJR (AM) in Madawaska, ME.

As per the request for information in F.C.C. letter, 8900-LJV, dated March 1, 1991.

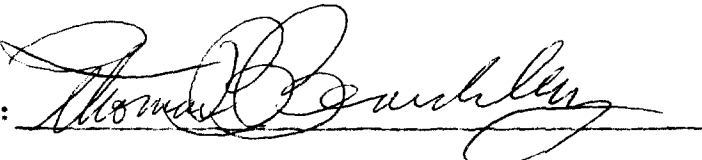

WSJR is making every possible effort to comply with 47C.F.R., Section 1.1307 as outlined in our answer to question number 7 and the related exhibit. (See attached copy.)

In addition to the steps outlined there, we have now constructed an additional fence, 3 meters from the base of our transmission tower, which fully encircles our antenna site.

Also, please note that there are no other broadcast facilities located within a mile in any direction from our antenna site.

WSJR is a 1000 watt AM radio station.

This amendment was prepared by Thomas B. Beardsley on March 5, 1991 following telephone consultation with Mr. William Hassinger of the F.C.C. by our engineer Aurel Daigle.

Signature: 

Title: General Partner,
Lamoille Broadcasting and Communications
Licensee.

Exhibit Number 3

The transmitter/Antenna site for WSTR is located in a remote area that is rarely, if ever travelled by the public. Much of the year it is accessible only by snowshoe. There are no residences or commercial buildings near it and it is clearly marked by three no-trespassing signs and eight RF Radiation warning signs. The base of the tower is completely fenced in by an eight-foot high fence, the entrance of which is padlocked.

All routine maintenance at the transmitter and antenna site is done between the hours of twelve midnight and six a.m., when WSTR is not in operation.

The STL transmit antenna for WSTR is located on a tower mounted on the peak of the roof of a two story building. A ladder is required for access to the roof. All maintenance on the tower and antenna is done when the STL is not in operation. The rooftop itself is not accessible by the general public and the three sides of the tower are labeled with RF Radiation warning signs.

Exhibit 3 pertains to question 7 and was prepared by Thomas B. Beardsley on October 21, 1990.
